12:00-13:00	<p><b>CIHR CAREER DEVELOPMENT SESSION: FINDING CAREERS WITHIN AND OUTSIDE OF ACADEMIA</b></p>	<p>Have you ever asked yourself what you want to be doing once you have finished your degree/fellowship? Are you curious about the broad range of opportunities that exist both within and beyond academia? Would you be interested in hearing from people who were in the same situation as you and are now in stellar careers?</p> <p>Finding careers within and outside of academia is a major stressor for trainees at all levels, and it is sometimes difficult to get career advice from academic mentors, especially regarding the multitude of career paths that exist outside of academia. The purpose of this session is to provide trainees with relevant information about career paths within and outside of academia to support informed career-related decisions in the future.</p> <p>This interactive panel session will consist of mentors from various sectors (academia, government, industry, and NGO) who will provide a brief synopsis of their career paths. Trainees and fellows will then be encouraged to ask the mentors about finding, obtaining, and excelling in careers within and outside of academia.</p> <p><i>This event is open to all.</i></p>
